Stag Hunt: Social Coordination

STAG HUNT

```
graph TD; Friends --> Support; Support --> Factors; Factors --> Rational; Rational --> need_want[need/want]; Factors --> Consequences;
```

	A
B	5,5
	0,3
3,0	3,3

→ Equi

Depends on gain of individual rather than loss to other.

Game for social cooperation

Have support?

↓

Risk taking more

↓

May obtain big prize

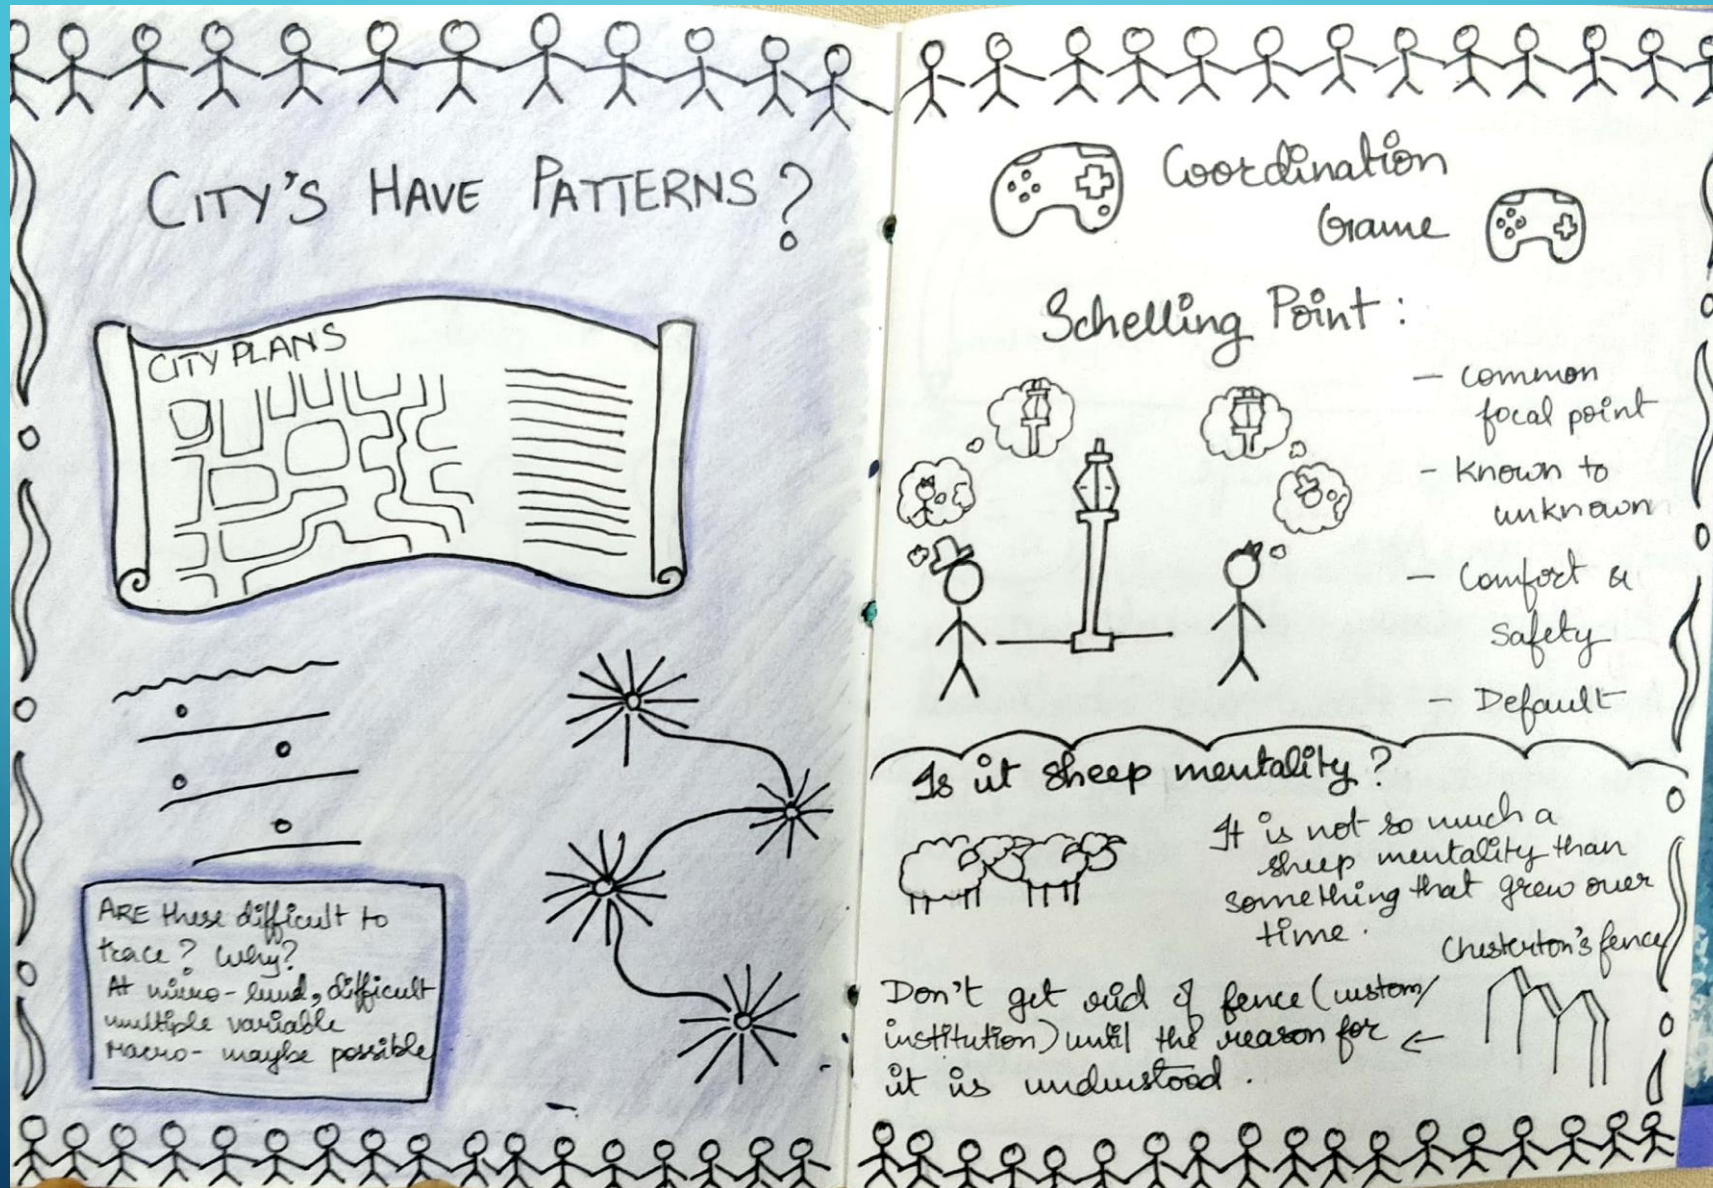

Default situation = 3,3 = Defect

Guarantees at least rabbit

With Stag → no guarantee.

People rather have the safer option than opt for bigger prize with higher risk.

City Patterns and Coordination Game

Biases

Collective "Small" = BIG

People have patterns throughout their lives & that affect city patterns too.

7 Seven stages of life
"Seven Ages"

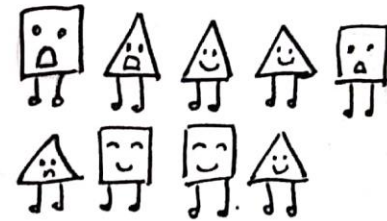

All these carry different patterns.
And all of them are interlinked.
An infant is controlled by its parents
but the parents are also controlled
by the infant.

Society exists in a give & take manner.
Every person contributes & takes something
irreplaceable.

Small bias
collectively result
in large-scale
bias.

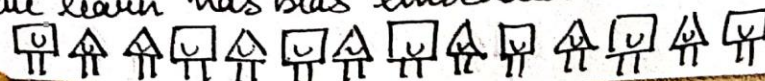

Being unbiased is also not the solution.
The situation doesn't change nor get
better just because you are unbiased.

Need to know
what is right
or wrong

We need to
unlearn and
re-learn a lot of

the thing. Anti-bias is the thing
that can effectively contradict bias.
History has shown how some of the things
we learn has bias embedded in it.
